In the Claims

B<sup>2</sup>  
18. (amended) An aerosol formulation comprising: a medicament, a propellant comprising 1,1,1,2-tetrafluoroethane and less than 5% by weight of  $\text{CHClF}_2$ ,  $\text{CH}_2\text{F}_2$ ,  $\text{CF}_3\text{CH}_3$ , or a mixture thereof, a surface active agent, and at least one other compound having a higher polarity than 1,1,1,2-tetrafluoroethane according to the Kauri-butanol value.

B<sup>3</sup>  
32. (amended) An aerosol formulation comprising a medicament, a propellant comprising 1,1,1,2-tetrafluoroethane, a surface active agent, and at least one other compound having a higher polarity than 1,1,1,2-tetrafluoroethane according to the Kauri-butanol value, the formulation being free of chlorofluorocarbons.

33. (amended) An aerosol formulation according to Claim 32, wherein the compound of higher polarity is selected from the group consisting of ethyl alcohol, isopropyl alcohol, propylene glycol, propane, butane, isobutane, pentane, isopentane, neopentane, [Propellants 11, 12, 114, 113, 142b, 152a, and 124,] and dimethyl ether.

Remarks

Applicants respectfully request entry of the amendment.

The first amendment above is a proper cross reference to related applications.

The second amendment above corrects a typographical error in the specification. This amendment was entered in the parent application and Applicants respectfully request that it be entered in this application. In support of this amendment Applicants enclose herewith a copy of the Amendment and supporting
